test file

Click on the "Asset folder" to add resources

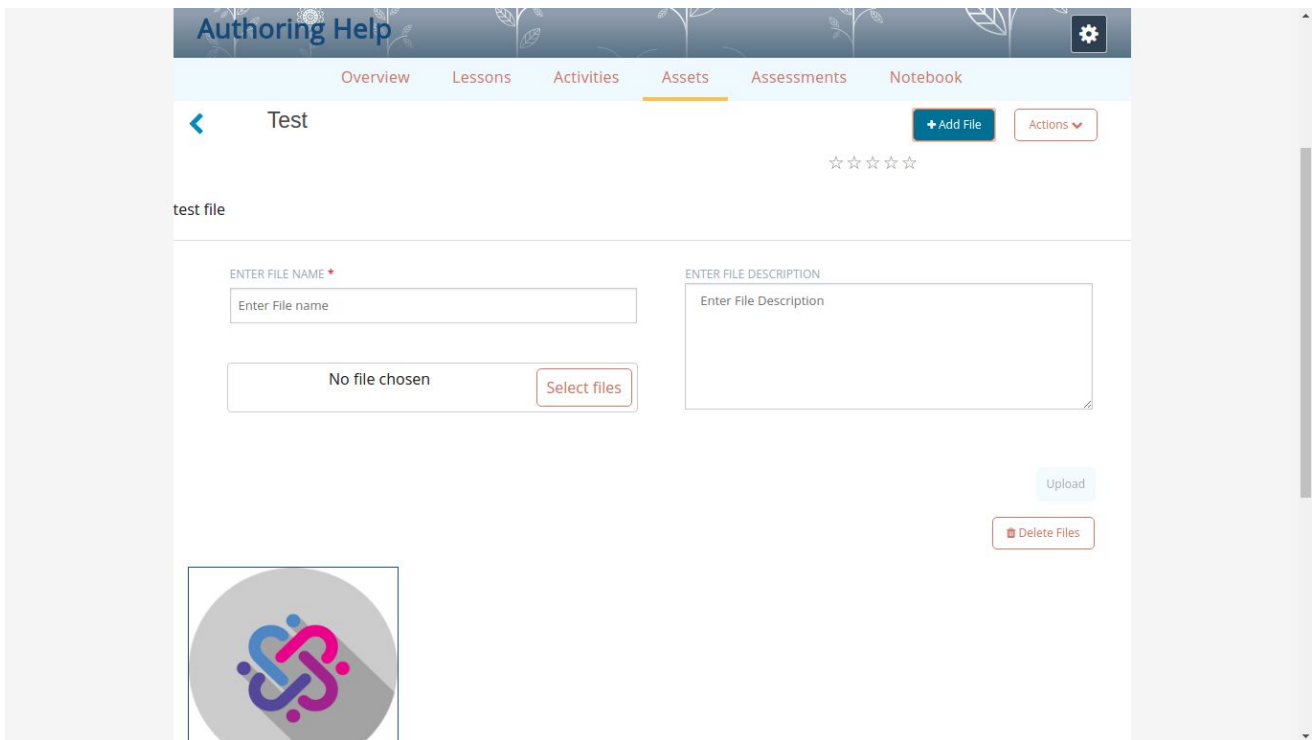

Click on “Add File”, fill the form and click on “Select Files” to upload any.

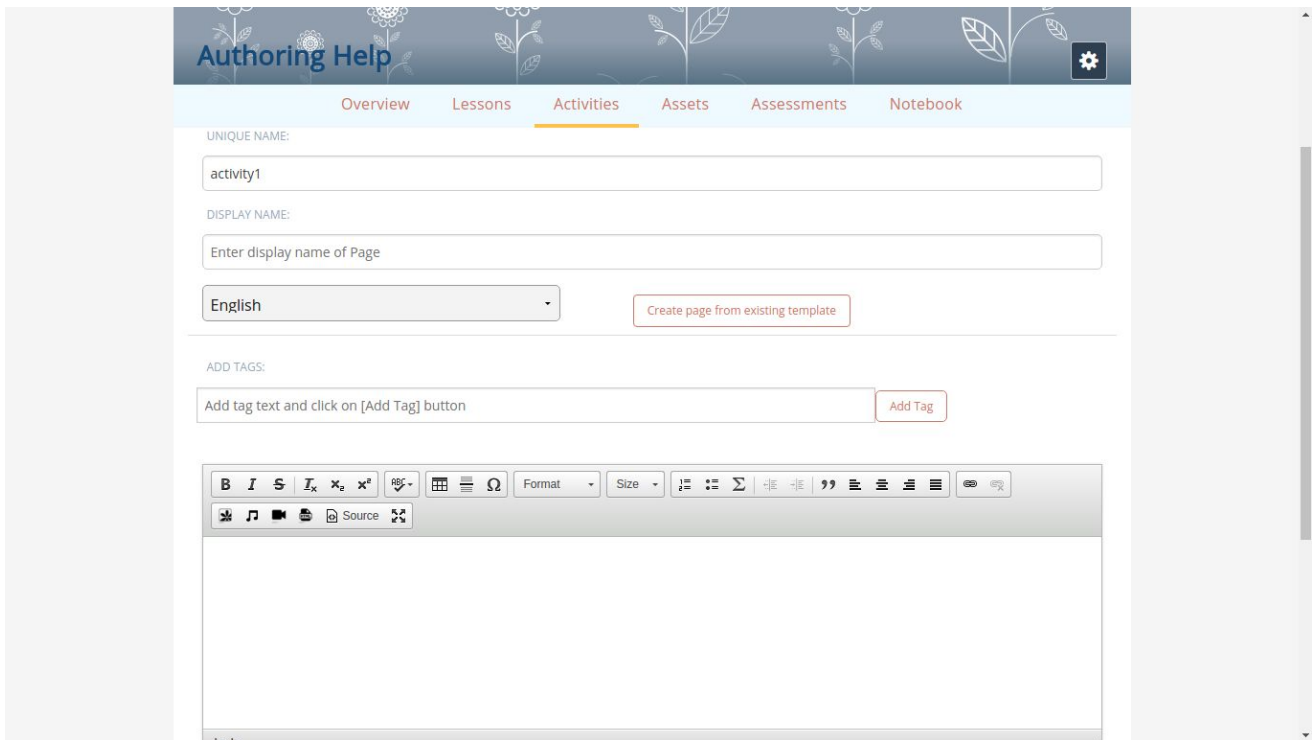

File is uploaded now.

Click on “Add File” to add more resources to the same folder.

Once the resource is added to the asset page, proceed to create an activity and use this resource in that activity.

To add Image from asset - Click on flower logo to add an image from the unit and select the size of the image (in px) in which you want to upload.

To add audio from asset - Click on music logo to upload an audio from the unit.

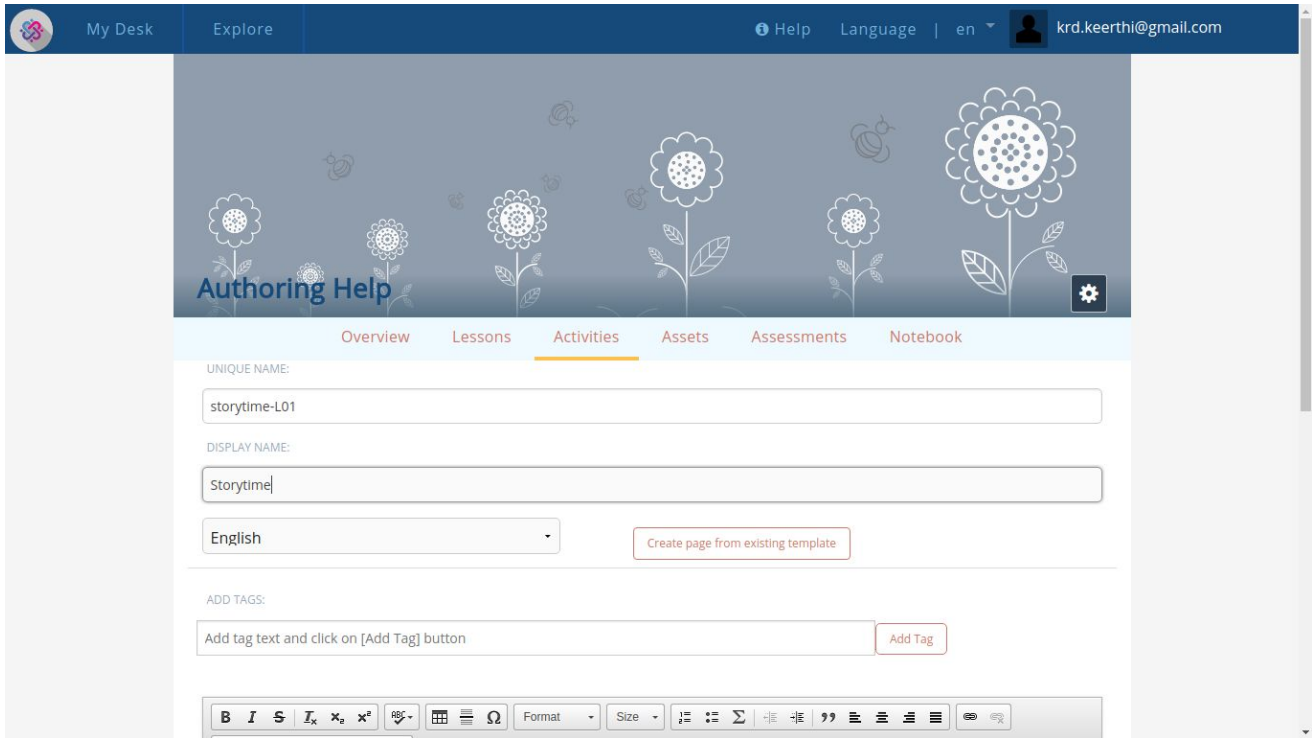

To add video from asset - Click on video logo to upload a video from the unit

To embed tools / to add assessment - Tools and assessments (which are authored) can be embedded using this option.

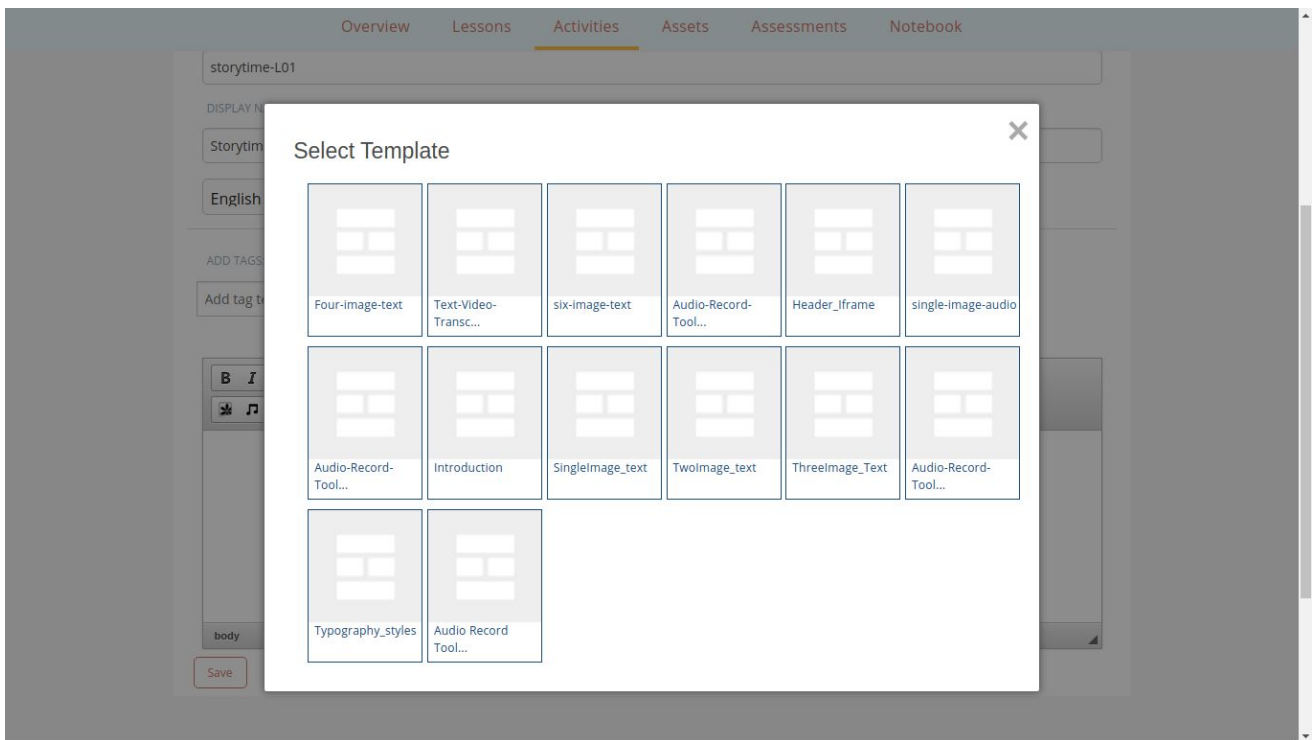

In case of tools click on name of the tool to embed directly and in case of assessment copy the link and paste the same.

Activity

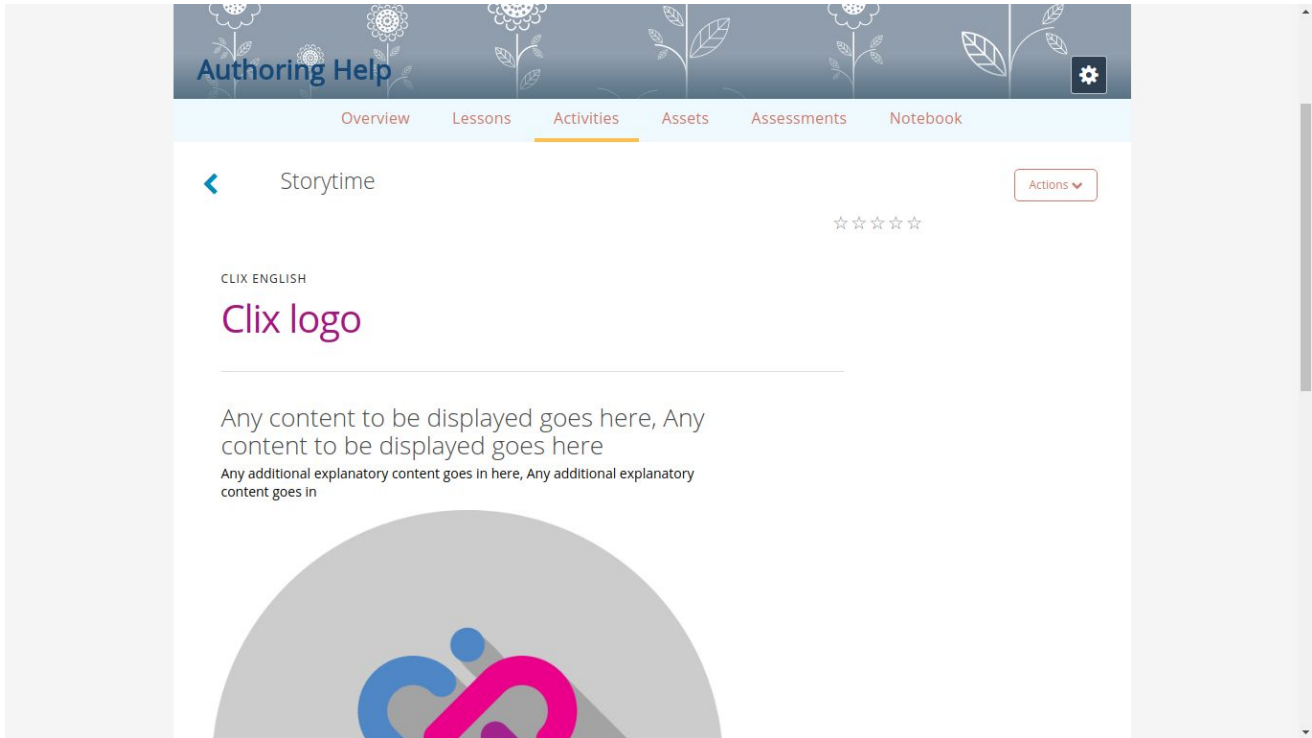

Click on activity

Click on “Create page from existing template” to use the existing templates for authoring.

Let us say, we are using `singleimage_text` for the activity. Change the image and text as required and click on save. Image and text existing in the template needs to be removed and the required ones needs to be added.

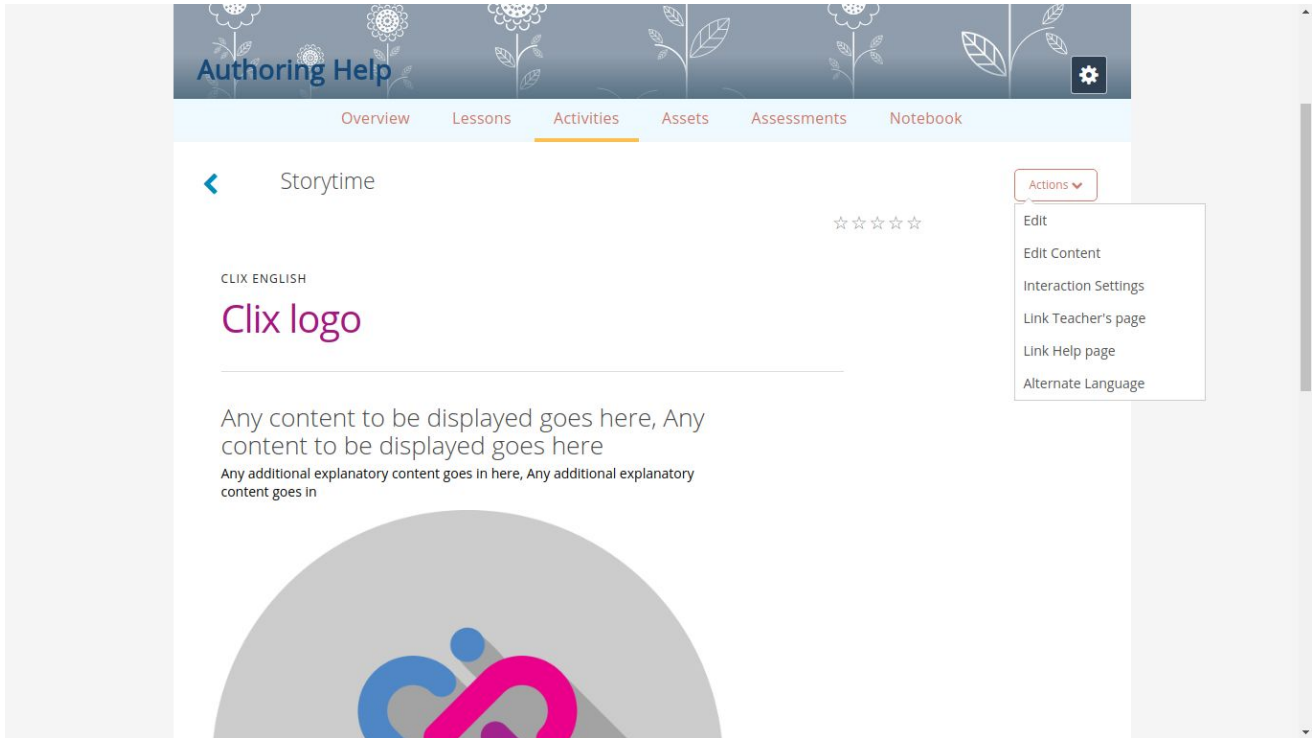

Edit and Edit content

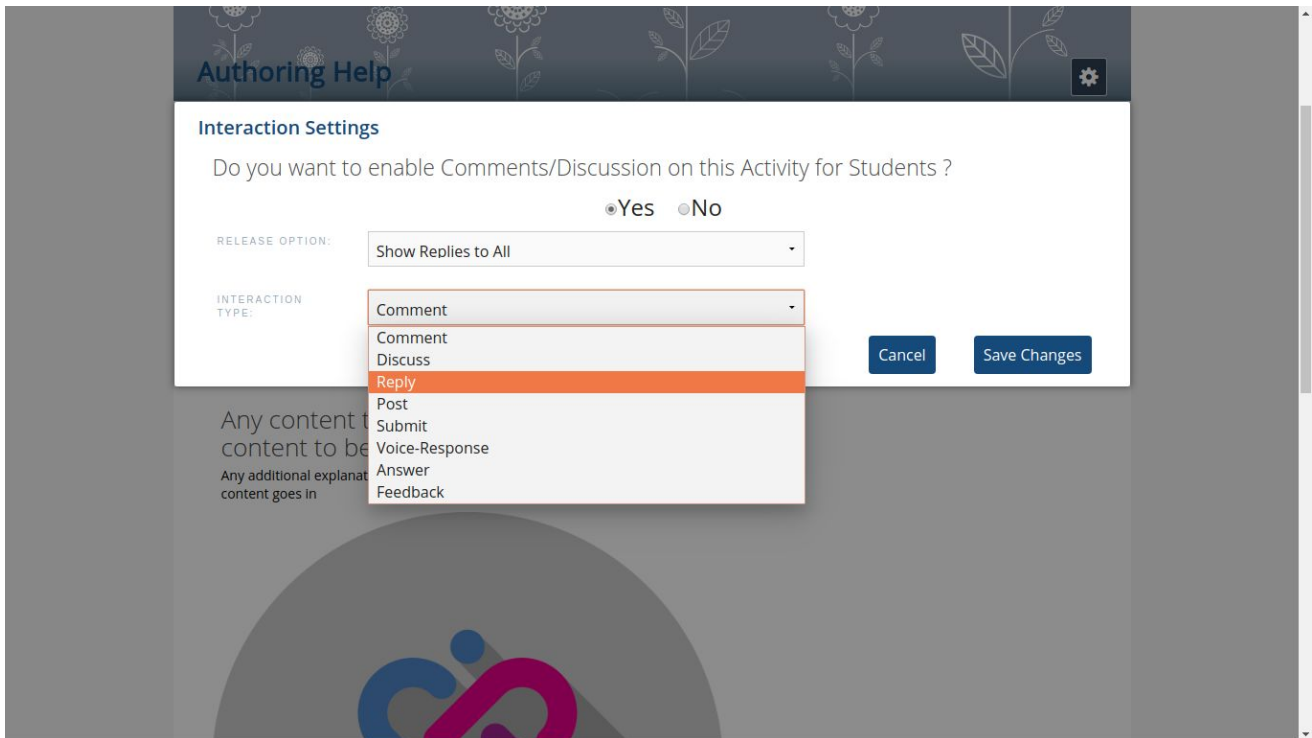

Click on “Actions” button to edit/edit content for existing activities. “Edit content” option is used for editing in “Let’s talk” activities.

Interaction settings

Click on Actions after an activity is created and select “Interaction settings”.

Select “yes” and select the type of button required and release option.

Note: Interaction button can be seen after announcing the course (in LMS).

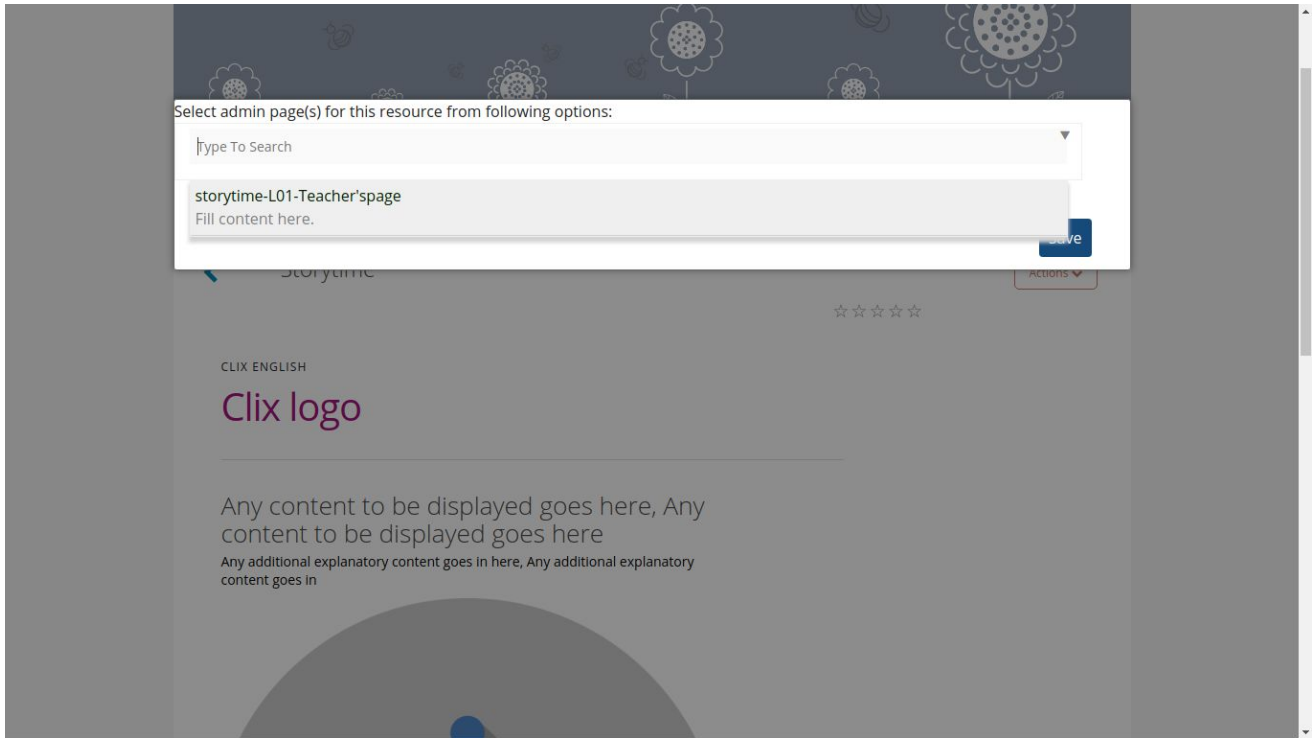

Teacher's page

Click on “+ Add Teacher's page” in “Activities” to create an activity page by filling the form. Add the content and click on save.

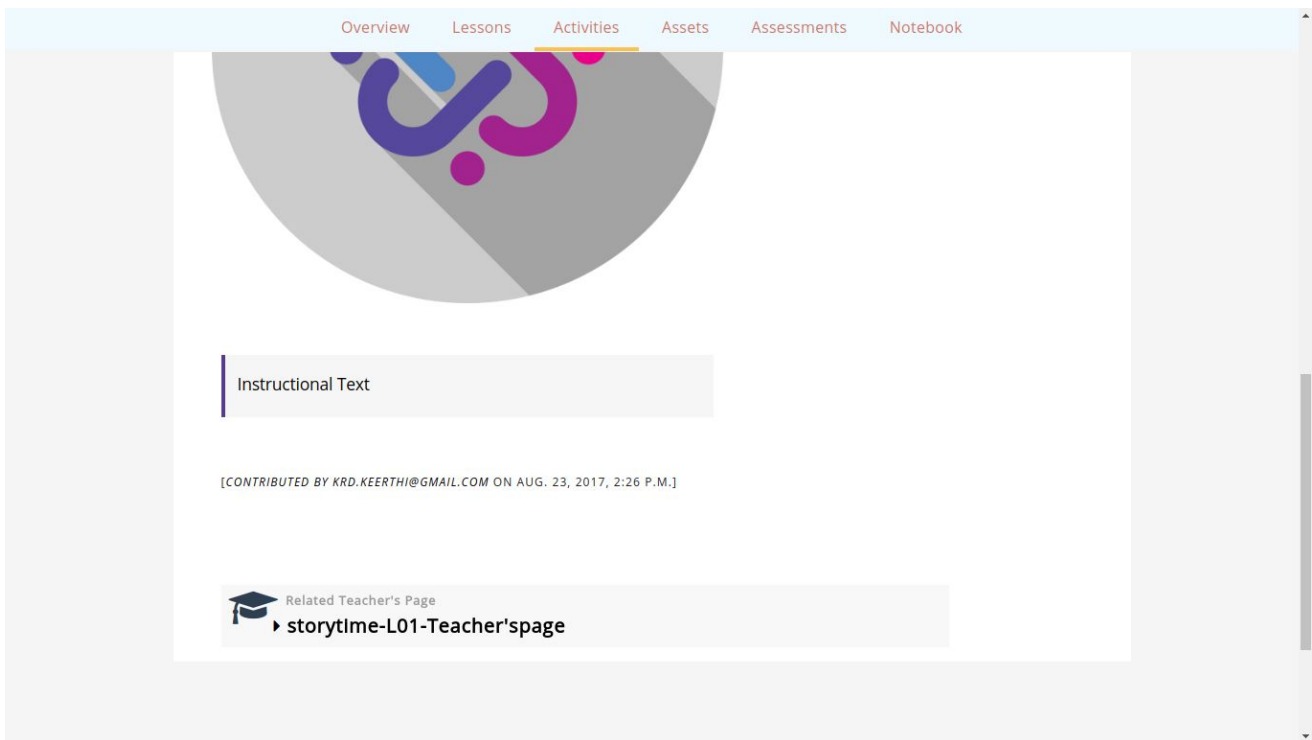

The screenshot shows the 'Authoring Help' interface with the 'Activities' tab selected. The form contains the following elements:
